

# MicroLaser Peel Consent

Today's Date: \_\_\_\_\_

## Overview

### Please initial after reading each of the following statements:

- \_\_\_\_\_ Multiple, consecutive treatments may be necessary to receive desired outcome.
- \_\_\_\_\_ Avoid sun exposure and always use a sunscreen of SPF 15+
- \_\_\_\_\_ I agree to comply with the pre and post treatment instructions given to me by my professional

## Treatment

- A burning sensation may be felt immediately post treatment and usually subsides within a few hours.
- Erythema (redness) and possible edema (swelling) may occur for several days.
- The skin may feel tight for several days.
- Dryness and/or flaking of the skin usually occur after 24-72 hours and may last several days.
- Results vary depending on skin color and severity of the condition being treated.
- Tanned and darker skin types increase the risk of post inflammatory hyperpigmentation, a darkening of the skin, which may take several months to resolve. This risk can be reduced or treated by using a topical lotion recommended by your professional.
- This treatment will not prevent future damage.

## Pre-Treatment Instructions

- Do not tan the area to be treated for 30 days prior or apply self tanner 2 weeks prior. You must wear sunscreen daily.
- Do not take the acne medication Accutane 12 months prior to treatment.
- Do not use medications causing photosensitivity for 4 weeks.
- If you have Herpes Simplex, starting an anti-viral medication prior to treatment is recommended to reduce risk of outbreak.
- If you are pregnant or trying to conceive, you may not receive this treatment.

## Post-Treatment Instructions

Temporary swelling, redness, or minor blistering may occur in the first 48 hours. The treated area is delicate and must be handled with care during this time. The skin will return to normal usually within 1-2 weeks. Avoid direct sun exposure for 48 hours. You must wear sunscreen daily. Tanning should be avoided for 4 weeks post treatment.

### Recovery

A post-treatment kit will be given to you. You may only use the products as directed during healing. Gently cleanse and splash to rinse with cool water. Follow by applying the lotion. Reapply lotion as needed. Follow these directions twice a day for 48 hours.

### Maintenance

A customized home care regimen will be recommended to enhance and support the results of your treatment. Repeating this treatment monthly will provide maximum skin improvement and will build on results of first treatment.

### Makeup

Makeup may be worn as soon as you would like. WellQuest Medical & Wellness recommends Glo Minerals. This is an extension of your skin care.

### Reactions

If you experience any reactions, call WellQuest Medical & Wellness immediately at 479.845.0880

## Acknowledgement

This procedure has been explained to me by my professional and my questions were answered. If you have any questions, please contact WellQuest Medical & Wellness.

I acknowledge that I have read, understand, and agree to follow the instructions above. I hereby give my consent to this procedure.
